# Producers, Pigs & Pork

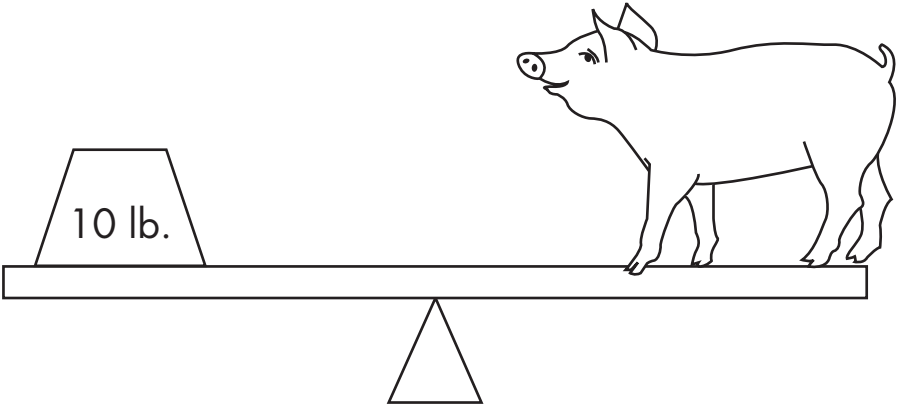

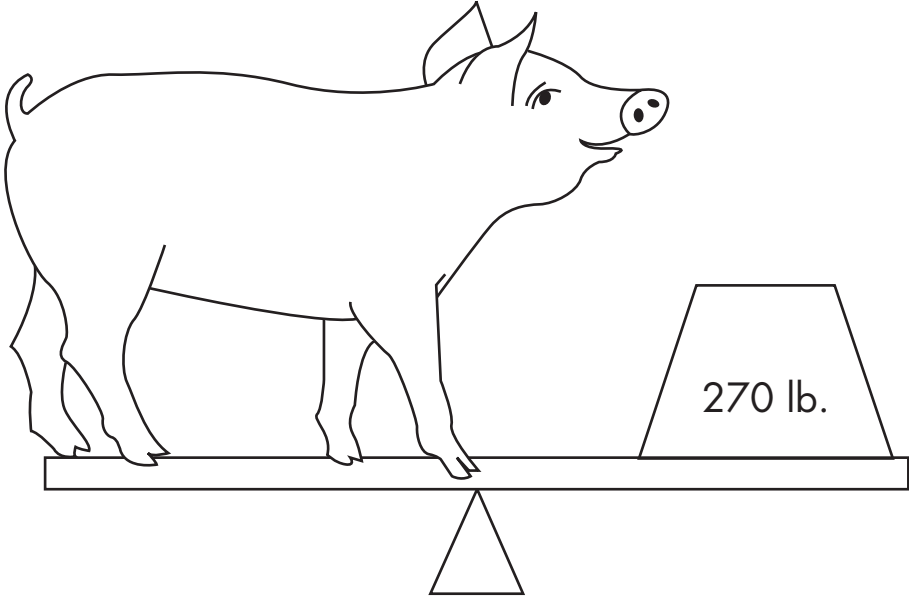

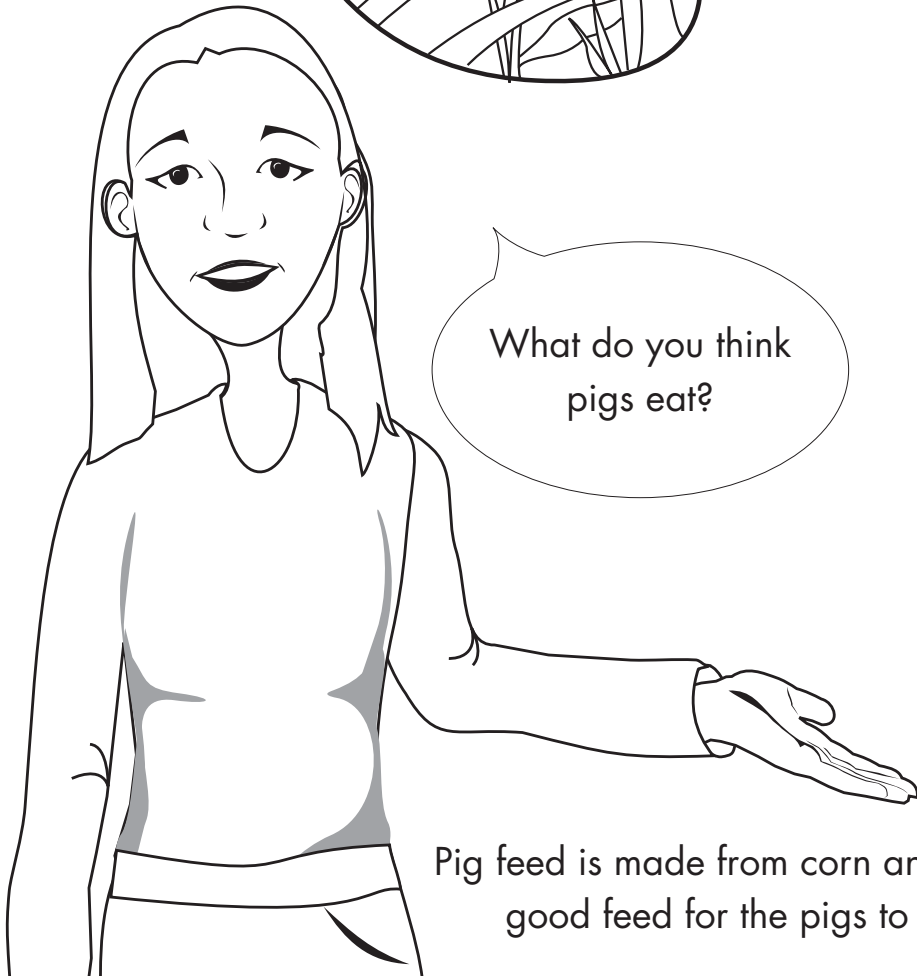

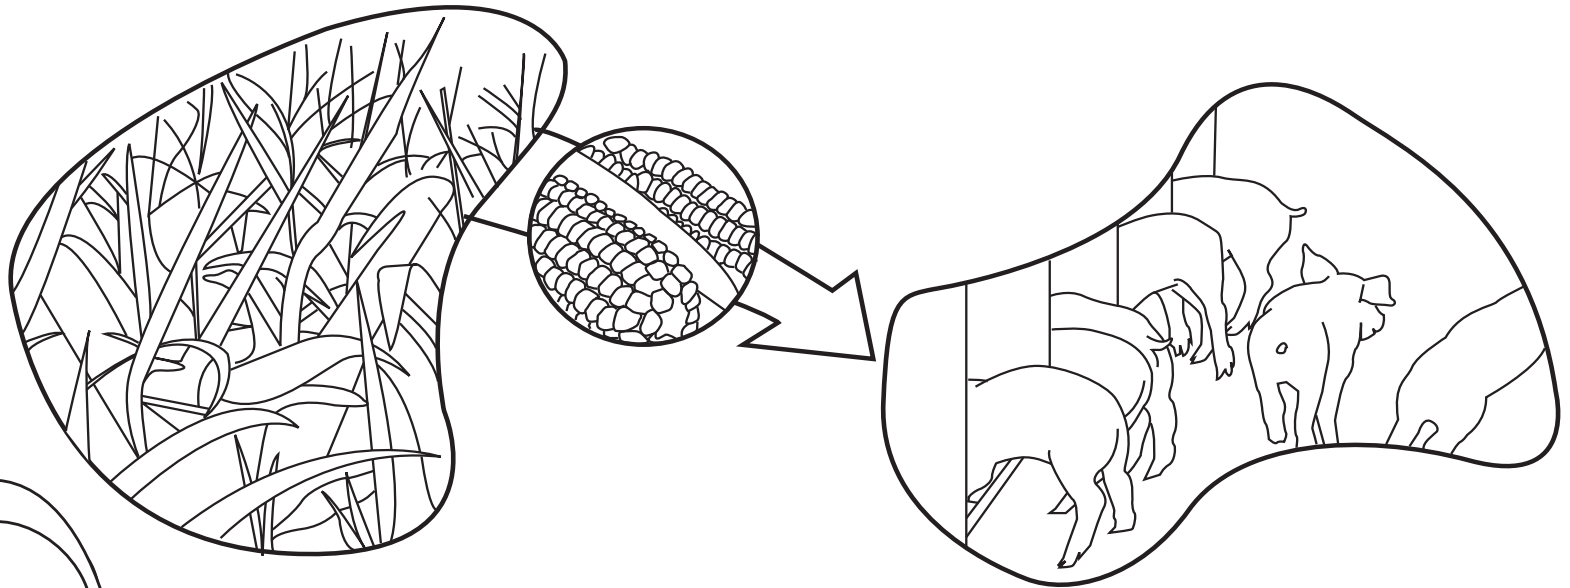

America's Pork Producers invite you to learn more about pigs.

Pigs eat a lot of feed  
and will grow to 270 pounds  
in just five months.

Market weight  
is 270 pounds  
and when the pigs  
are market weight  
they can be sold.

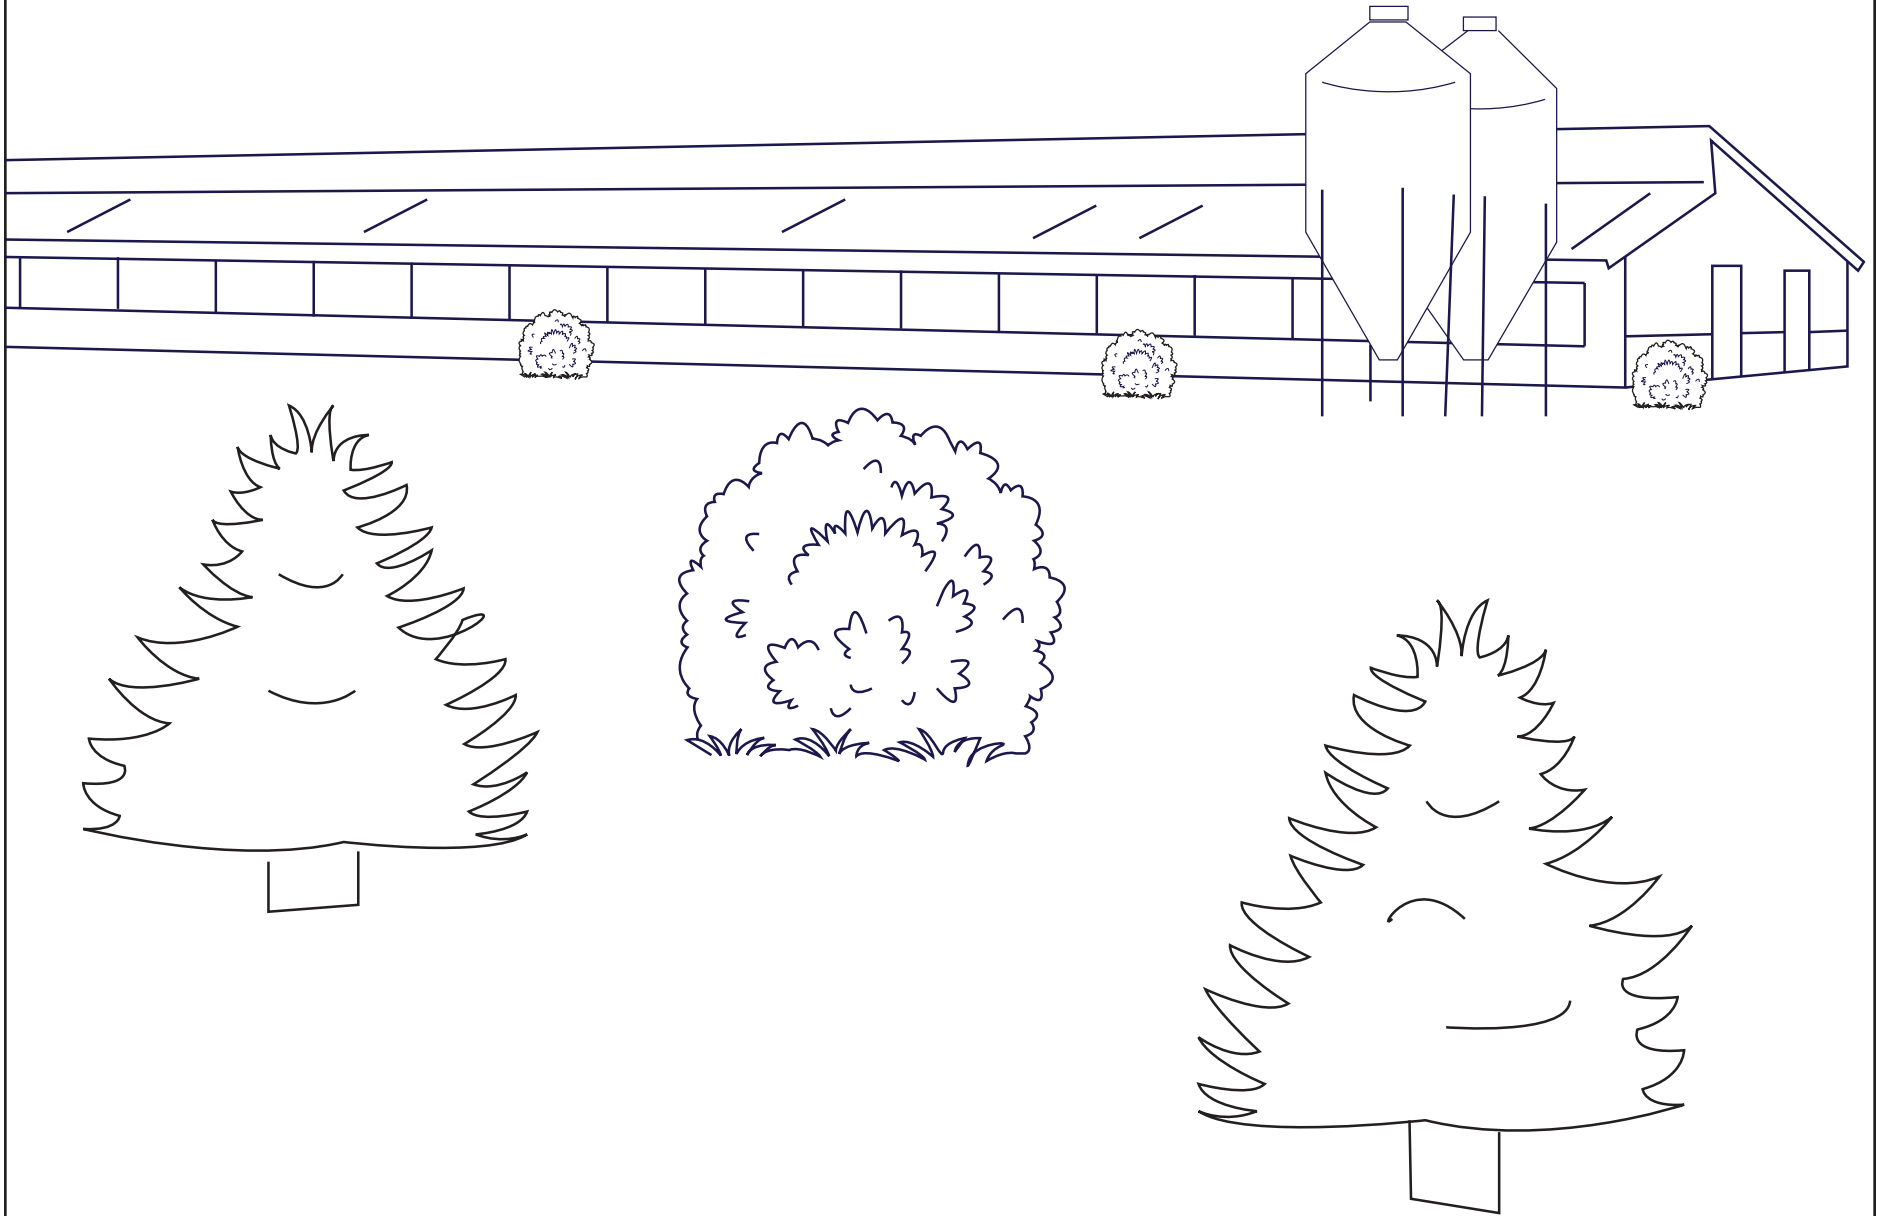

What do you think pigs eat?

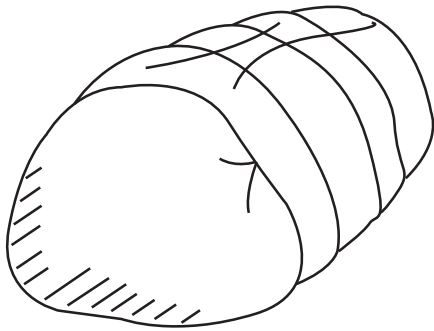

I'm not sure. Maybe leftover food or table scraps?

Pig feed is made from corn and soybeans. We provide good feed for the pigs to help them grow fast.

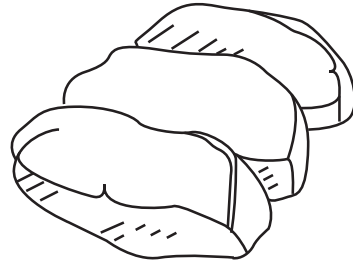

Pork producers also take care of the environment when they are raising pigs.  
They plant trees and bushes that help reduce dust and possible odor.

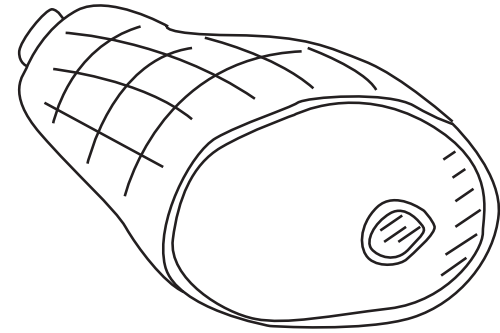

When pigs leave the farm, they go to a plant where they become food such as pork chops, ham, sausage and bacon.

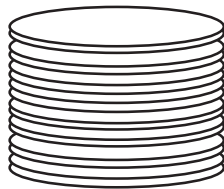

Pork Roast

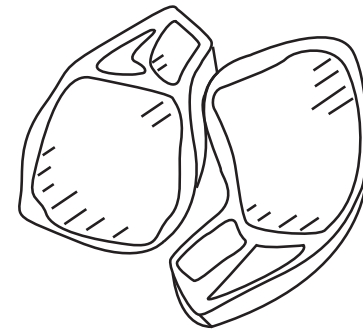

Boneless Pork Loin Chops

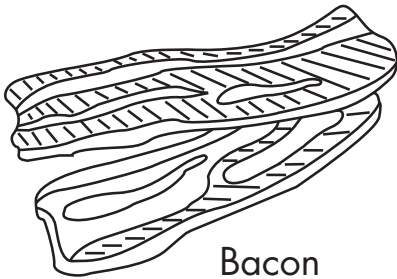

Ham

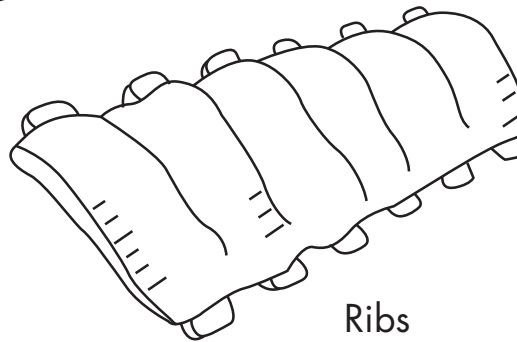

Bologna

Pork Chops

Bacon

Ribs

Finally,  
people like you  
and your family  
get to enjoy  
the safe,  
healthy and  
delicious food  
that comes  
from my farm!
